

MODULE H. HARDWARE REVIT

H.29 BOM

The H.29 BOM video outlines how to generate a detailed list of quantities for each type of **Hardware** used in the project. Additionally, it explains the method for filtering specific components, allowing an isolated view of only the selected elements.

01. *Perform the following activity according to the instructions given in video H.29 BOM:*

DEWILDT RESIDENCE

Based on the RVT file “*Dewildt Residence*”, generate a materials list in **Excel** by employing the “**BOM**” command.
